## THE PARTNER BODY WORN VIDEO SYSTEM

### Key Features

- Full HD recording (1080p)
- Time/Date/Device Information displayed on each frame as a watermark
- Pre-Record functionality of up to 10 minutes
- 32GB onboard memory
- In service exchangeable batteries
- Ruggedised and lightweight
- 4 hours continuous recording on a single battery
- Wide angle 120° lens
- 6 x IR lights for night-time recording up to 15 metres
- White LED for additional illumination
- One button recording
- High quality built-in microphone
- Additional extension camera options, such as a discreet camera or a headcam

The Partner Body Worn Video System (BWVS) has become an essential part of the frontline security professional's toolkit. Not only does the BWVS provide evidence as an independent witness, but it has been proven to reduce physical violence as well as verbal abuse. The Partner BWVS has been developed to assist frontline security personnel by ensuring secure critical video and audio capture. The battery can be swapped in service to ensure the camera remains in operation and it can also be charged separately to the device to sustain continuous use of the camera. An infrared functionality turns on the infrared LEDs, either manually or automatically, to illuminate in the dark when required to ensure the best quality recording. A white light LED provides additional illumination as required. Its functionality, lightweight robust design and leading edge technology make our system the BWVS of choice.

Video resolution	1920 x 1080/1440 x 1080/ 1280 x 720P/ 848 x 480p/ 720 x 480p
Zoom lens	Supports 1-8x digital zoom
Externally connected with camera	Yes
Camera has Push to Talk function (PTT)	Can be integrated with various types of radio, subject to synchronisation
Charging support	HDMI output, can be used as USB
Power source	2000mAH lithium ion battery
Shell protection grade	Meets IP57 in GB4208
Display	TFT-LCD 2 inch high definition colour display
Camera angle	120°
Focusing range	From 0.1 M to infinity
Storage capability	Misco TF Card, 32GB built-in memory
Continuous recording	4 hours
Standby time	480 hours (with auto sleeping mode)

The Partner BWVS is an all-in-one, lightweight (160 grams) and small in size (80mm X 60mm X 35mm) body worn video system (BWV) with intelligent and secure storage of recorded footage. The 32GB HD camera, which is UK Home Office compliant, can be used as a single shot or video camera. The BWVS can be mounted in a variety of positions, including epaulettes, and any part of a jacket front panel. The lightweight, robust design and leading edge technology, including a market leading visual angle of 120°, assists frontline security personnel while operating. The BWVS has approximately 4 hours continuous video recording on low resolution with 480 hours standby time. The recording formats used are: Video – MP4; Photo – JPG; Audio – WAV.
