

AD 360 – Adams 360 Degree Compact Metal Detector

The AD360 is a unique metal detector with a 360 degree detection area which covers the entire surface of the probe. This lightweight, robust unit measures 9.3 inches long and weighs just over 200 grams. The Adams AD360's design allows for detection in hard to reach areas and tight angles and the tough casing allows it to be used in all weather environments.

Key Features

- 360 degree detection
- Compact and lightweight
- Hardened weather resistant case
- Detects all ferrous metals
- Runs up to 400 hours
- 2-year warranty

Length	24cm
Batteries	1x9V Battery
