

Centre Chest 4-Point Harness with KlickFast Dock

The Centre Chest 4-Point Harness with KlickFast Dock is made to secure any compatible radio or body camera centrally for easy access and greater field of view. The harness has four adjustable and elasticated straps connected to a single central point at the front where the KlickFast Dock is housed. Made from strong nylon, the Centre Chest 4-Point Harness with KlickFast Dock is durable and can be used in the toughest environments.

Due to its positioning, this harness may be unsuitable for use with some uniforms, such as suit jackets.
